Drugs Brain And Behavior 6th

A Harvard Health article Understanding Addiction How Addiction Hijacks the Brain Addiction involves craving for something intensely, loss of control over its use, and continuing involvement with it despite adverse consequences. Addiction changes the brain, first by subverting the way it registers pleasure and then by corrupting other normal drives such as learning and motivation.

Understanding Addiction - HelpGuide.org

Sexual addiction, also known as sex addiction, is a state characterized by compulsive participation or engagement in sexual activity, particularly sexual intercourse, despite negative consequences.. Proponents of a diagnostic model for sexual addiction consider it to be one of several sex-related disorders within an umbrella concept known as hypersexual disorder.

Does evolution explain why the human brain supports religious belief? Dimitrios Kapogiannis and Jordan Grafman, scientists at the National Institutes of Health, follow up on a recent scientific paper by stating that brain networks that evolved for other purposes have given rise to our capacity for religious belief and experience.

Toxoplasmosis is a parasitic disease caused by *Toxoplasma gondii*. Infections with toxoplasmosis usually cause no obvious symptoms in adults. Occasionally, people may have a few weeks or months of mild, flu-like illness such as muscle aches and tender lymph nodes. In a small number of people, eye problems may develop. In those with a weak immune system, severe symptoms such as seizures and poor ...

The main culprit causing the epidemic destroying people's homes and communities across USA is simple, and it stands right before our eyes. Yet, so ingrained in the brain is our historic belief that war somehow "serves our nation", that the American people, not unlike the German people back in Nazi days, are unaware of their own reality.
