Digital television (DTV) is the transmission of television signals, including the sound channel, using digital encoding, in contrast to the earlier television technology, analog television, in which the video and audio are carried by analog signals. It is an innovative advance that represents the first significant evolution in television technology since color television in the 1950s.

Brain representation. Each finger has an orderly somatotopic representation on the cerebral cortex in the somatosensory cortex area 3b, part of area 1 and a distributed, overlapping representation in the supplementary motor area and primary motor area.. The somatosensory cortex representation of the hand is a dynamic reflection of the fingers on the external hand: in syndactyly people have a ...

Using a file sync software is essential because most users work on more than one computer and often entire teams work on the same document. As a result, all the changes made by different users have to be visible to all users. File sync software is a life saver for many users because it saves you...
