Evidence based practice promotes the application of research evidence as a basis on which to make health care decisions so it is important to search for the truth and knowledge logically. Robust research which may draw on expertise and experience represent a higher level of evidence because of the discipline involved (Burns & Grove 2007).

### **Evidence Based Practice in Nursing Essay**

Evidence-based practice has now spread into a diverse range of areas outside of health where the same principles are known by names such as results-focused policy, managing for outcomes, evidence-informed practice etc. This model of care has been studied for 30 years in universities and is gradually making its way into the public sector.
