Medical transport of high-risk and critically ill newborns requires skilled personnel and specialized equipment. Ideally, a neonatal transport team forms a single component associated with a larger system of perinatal care composed of a tertiary care neonatal intensive care unit (NICU), a perinatal care unit, cadres of medical and surgical pediatric subspecialists, and a neonatal outreach program.

Transport of the Critically Ill Newborn: Overview ...

A neonatal intensive care unit (NICU), also known as an intensive care nursery (ICN), is an intensive care unit specializing in the care of ill or premature newborn infants. Neonatal refers to the first 28 days of life. Neonatal care, as known as specialized nurseries or intensive care, has been around since the 1960s.

The first few weeks of an infant's life are a time of changes, transitions and challenges unique to this stage of existence. Neonatal nurses are the experts who care for newborns in a nursery setting; the neonatal period is considered to be the first 28 days of an infant's life, but neonatal nurses may

work with babies for much longer.

Motor vehicle collisions remain the leading cause of death in Canadian children [1][2]. In 2006, 16% of Canadian motor vehicle traffic collision fatalities and 19% of injuries occurred among children and adolescents (zero to 19 years of age) [3]. Despite all 10 provinces and three territories having laws requiring the use of child safety seats, many injuries and deaths are directly attributed ...
