History. Mark Curphey started OWASP on September 9, 2001. Jeff Williams served as the volunteer Chair of OWASP from late 2003 until September 2011.

## **OWASP - Wikipedia**

Web application security is a branch of information security that deals specifically with security of websites, web applications and web services.At a high level, web application security draws on the principles of application security but applies them specifically to internet and web systems.

## **Web application security - Wikipedia**

Web Application Security Consortium The Web Application Security Consortium (WASC) is 501c3 non profit made up of an international group of experts, industry practitioners, and organizational representatives who produce open source and widely agreed upon best-practice security standards for the World Wide Web.

## **Home - Web Application Security Consortium**

Easy to use and extend. The w3af framework has both a graphical and console user interface, in less than 5 clicks and using the predefined profiles it is possible to audit the security of your web application.

## **w3af - Open Source Web Application Security Scanner**

Why Security Is Critical. Web applications need to freely allow traffic through a variety of ports and usually require authentication; this means they also require a complex web application vulnerability scanner.Since websites must allow traffic to come and in and out of the network, hackers often attack the most commonly used ports.
