Template Test script - TMap

Test Scripts This story begins with the most detailed way to document testing, the test script. When people talk about test scripts, they usually mean a line-by-line description of all the actions and data needed to perform a test. A script typically has 'steps' that try to fully describe how to use the program — which buttons to press, and in which order — to carry out a particular action in the program.

Test Scripts, Test Cases, and Test Scenarios ...

A test script is probably the best manual vehicle to document a trail of actions, but you can also document a process with test cases ordered sequentially by using a test matrix. The level of relative risk

How to Develop Test Cases and Test Scripts for Web Testing

Definition of Test Script - A test script is a document that contains a series of instructions to be performed to determine if the utility/system, equipment, or process functions as expected.

Writing Effective Test Scripts and Validation Protocols ...

Documenting Test Scripts. As seen in the Executing Test Scripts section, the documentation is generated from the test script itself. There are several things that can be included in a script to help document it more. These are documented here. Simply update the existing passingAssertEquals.xml script to include the documentation tags above...
